

FACT SHEET

Federal Emergency Management Agency (FEMA) Funded Water Line Replacement Project *Central Business District / French Quarter*

THE SEWERAGE &
WATER BOARD OF
NEW ORLEANS

FEMA Funded Water Line Replacement Project Overview:

The New Orleans water distribution system was severely damaged by Hurricane Katrina. In an effort to restore the water system to its pre-hurricane function and capacity, the Federal Emergency Management Agency (FEMA), the Sewerage and Water Board of New Orleans (SWB) and the City's Department of Public Works (DPW) are collaborating to develop a systematic, cost effective approach to restore the water distribution system. After a thorough assessment by a joint team of FEMA and SWB staff, 135 miles of water distribution lines qualified for FEMA-funded replacement. The total estimated value of the water line replacement project is \$183 million. The SWB is coordinating engineering design activities with DPW as part of the FEMA-funded Recovery Roads program. The majority of the water lines replacement work will happen concurrently with DPW's Recovery Roads Program.

Project Summary:

The Central Business District/French Quarter FEMA-funded Water Line Replacement construction contract was awarded to Boh Brothers Construction of New Orleans, LA for approximately \$6.8 million. The scope of work includes excavating the roadway, replacing damaged or leaking water lines, placing fill material beneath the roadway, and paving the roadway.

Work in the Central Business District began in November 2013 and is nearing completion. Work in the French Quarter began in March 2015 and is scheduled to last through early 2016.

What to Expect During Construction:

Residents and commuters traveling to and from the area should exercise caution when driving, bicycling or walking near the construction sites. Types of temporary construction impacts to expect include limited access to areas within in the construction zone, detours, movement of heavy equipment, safety signage and sounds. In general, construction crews will be working from 7 a.m. to 5p.m., Monday through Saturday.
